

Rohan Magar

Georai, Beed, MH | magarohan8@gmail.com | 8308822538 | [Linkedin](#) | [Github](#)

Full-stack developer skilled in React, Django, Django REST Framework, REST APIs, PostgreSQL, and backend system development. Experienced in building secure and scalable web applications, authentication systems, and database-driven solutions. Strong understanding of frontend-backend integration, API development, database management, and software development workflows with strong analytical, debugging, and problem-solving abilities.

Education

Department of CS & IT, Dr. Babasaheb Ambedkar Marathwada University (Dr. BAMU), Chh. Sambhajinagar

Master of Science (MSc) in Computer Science

Sept 2024 – May 2026

- GPA: 7.19/10.0

Experience

Freelance Full-Stack Developer

[Letter](#)

Attendance Management System for Manikchand Pahade Law College, Chh. Sambhajinagar

Jan 2025 – Mar 2025

- Worked in a 2-member development team to design and deliver a full-stack Attendance Management System for the college using **React** and **Django REST Framework**.
- Developed 10+ responsive frontend modules and secure **REST APIs** with **JWT-based authentication** and role-based access control for Admin, Faculty, and Students.
- Designed and managed **PostgreSQL/MySQL** databases to automate manual attendance tracking, reporting, and student record management processes.
- Successfully deployed and delivered the system to the institution, improving administrative efficiency and reducing manual paperwork.

Projects

Hybrid RF-LSTM Intrusion Detection System

[Paper](#)

Python, TensorFlow, Scikit-learn

Dec 2025 – Mar 2026

- Developed a hybrid intrusion detection model combining Random Forest and LSTM algorithms for cyberattack detection.
- Processed the CICIDS2017 dataset using preprocessing, feature engineering, and SMOTE balancing techniques.
- Achieved 99.90% accuracy with ROC-AUC of 0.99993 while reducing false negatives.
- **Published** research paper in the International Journal of Computer Science Engineering Techniques (IJCSE), 2026.

AI Resume Analyzer

[Link](#)

Python, Django, React, NLP, PostgreSQL

Jun 2026 – Apr 2026

- Developed an AI-powered resume analysis platform for ATS score evaluation, resume parsing, and skill extraction.
- Implemented NLP-based keyword analysis and job-role matching to improve resume screening and candidate evaluation workflows.
- Built secure REST APIs using Django REST Framework and responsive frontend interfaces using React.
- Integrated PDF processing, analytics dashboards, and PostgreSQL database management for resume storage and reporting.

Technical Skills

Languages: Python, JavaScript, SQL, C/C++, R Programming.

Frontend Technologies: React, Tailwind CSS, HTML5, CSS3.

Backend Technologies: Django, Django REST Framework, Express.js, REST APIs, JWT Authentication, WebSockets.

Databases: PostgreSQL, MySQL, MongoDB.

Tools & Platforms: Git, GitHub, Linux, Docker, Kubernetes.

Machine Learning & Data Science: TensorFlow, Scikit-learn, NLP, SMOTE.
